

ASSOCIATE LEVEL - SENIOR CHARTERED ENGINEER

We require an experienced Structural Engineer with the ambition to join a leading consultancy working on a wide variety of building projects. Would you relish the opportunity to work in a successful and well-established consultancy as you look to progress your career?

You would be a chartered Senior Structural Engineer with at least 5-10 years experience looking for that next level opportunity with all the benefits. Here, you'll join forces with a leading multi-discipline consultancy.

You must have the skills and experience to lead a team and progression within the practice will come with all the benefits and responsibilities.

- Demonstrate high design standards and thorough knowledge of Eurocodes and British Standards
- Have previous experience in a senior role with the ability to manage and develop the engineering team
- Work efficiently with other engineers and technicians to deliver multiple project designs
- Demonstrate the management and development of the structural engineering team

Here, you'll receive:

- * Salary of between £55,000 - £75,000 per annum depending on experience
- * Private healthcare
- * Life assurance

What you'll bring as the new Senior Structural Engineer:

- * Chartered Structural Engineer (MIStructE)
- * Minimum five years' experience as a Senior Structural Engineer
- * Experience of design all common building materials
- * The ability to liaise with clients and other stakeholders
