

Experienced Civil/Structural Engineer/Graduate – WITHAM/NORWICH

We are currently seeking an experienced civil/structural engineer/graduate to join our team. You should possess a degree in Civil/ Structural Engineering. You should also be familiar with British Standards and Eurocodes.

The company undertakes various assignments ranging from small local projects to large national projects. Operating in many sectors including Residential, Healthcare, Industrial, Education, Retail & Leisure, Commercial and the public sector.

The ideal candidate will be an effective communicator, able to work independently and as part of a team. Your duties will include structural engineering design, project management and coordination with other professionals both internally and externally.

You will be responsible for:

- Liaising with clients and other design team members and attend meetings
- Developing structural engineering designs and preparing design calculations in steel, concrete, timber and masonry
- Identifying project risk

In return we offer a competitive salary, pension and private healthcare with excellent working conditions in a friendly environment and potential for career growth.
